

ABSTRACT OF THE DISCLOSURE

5 A display and storage device for pictures, photographs, drawings and
other artwork and printed matter, and more particularly a display and storage device that
serves as a decorative or functional piece of furniture. The device comprises a body
member having a plurality of walls for forming at least one inner cavity and at least one
access port. The inner cavity is adapted to removeably receive and store a series of
panels. Pictures, photographs, drawings and other artwork and printed matter are
10 removeably mounted onto at least one face of each panel. The panels are inserted into
the inner cavity of the body member through the access port in a vertical or horizontal
orientation, and can be removed from the inner cavity through an access port for viewing
or for interchanging the panel sequence. At least one wall of the body member is
adapted to display the panels together with their mounted pictures, photographs,
15 drawings and other artwork and printed matter.
